WARNING

This document contains classified information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793 and 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive TALENT-KEYHOLE information. Its security must be maintained in accordance with KEYHOLE and TALENT regulations.

SHEN-YANG AIRFIELD NORTH AND AIRFRAME PLANT 112

1. Shen-Yang Airfield North and Airframe Plant 112 (41 52N-123 26E) located 4 nm north of Shen-Yang, as searched for aircraft, crates, and construction material.

2. A total of 2 FARMER and 25 probable FARMER are parked in the aircraft repair facilities area, on the alert apron and on the parking apron at the south end of the airfield. One possible partly assembled FARMER is located in front of the repair hanger (annotation 30) and consists of a fuselage with the left wing and tail section attached and the right wing lying on the ground at the right side of the aircraft. No other aircraft, aircraft parts or aircraft construction materials were observed either at the airfield or in the plant area.

3. Nine crates 15 feet X 5 feet are located in front of the repair hanger.

25X1C

4. There has been no new construction at either the plant or airfield since Mission [REDACTED]

5. All measurements have been made by the NPIC Technical Intelligence Division, haze and the resultant poor image quality limit the accuracy of the measurements to [REDACTED] whichever is greater.

ENCLOSURES:
